The Elements - Unknown Super Heroes That Formed The Earth We Know

16 2 4

Chapter 1 by Keith Woolley

Hydrogen is the self proclaimed number one superhero. He is light, so light that he floats - effortlessly. The power of invisibility means that he can be in places and do his work when no-one can see him. Hydrogen's main power is his explosiveness when duplicated. Hydrogen forms strong bonds (friendships) with other super heroes and his loyalty means these bonds are hard to break.

Chapter 2 by intellikat

Tell that to Dr. Hindenburg! To him, Hydrogen is only a villain.

Chapter 3 by Keith Woolley

Maybe Hydrogen only became a villain after he saw how the other elements grew? He wanted the power that individual elements got by joining other elements?

Then Hydrogen found Oxygen and looked for more help. Another Oxygen joined, felt strange at first, but then the group flowed forward - as Water.
